Product Name:

Snap-foam stinger berm

Special Features:

The foam sidewall system consists of urethane (fed. Spec. Ppp-c-1752d, type 1, class 1, grade a) encased in a fuel - chemical resistant membrane cover. The sidewall design incorporates high strength connectors and a two way air relief system that facilitates automatic entry - exit without assistance. The foam sidewalls collapse in either direction and snap back automatically to their upright position. The foam logs are utilized on the entry - exit and next to the entry-exit so that a tanker can be driven in or out at will.

Shelf Life:

N/a
