General Description:

Electro-chemical cell c/o cathode, anode, potassium chloride electrolyte gel, tubular diaphragm (membrane) in the sensor electrode assembly (hyperbaric); stability type 1 percent per 24 hr, 5 percent per 2000 hr; amplifier, less than 1 percent per year; temperature range 29 degrees -130 degrees f operating, -40 degrees -130 degrees f storage

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
