| Stage Quantity:                           |
| 1   |
| Intake Connection Quantity:               |
| 1   |
| Intake Connection Type:                   |
| Threaded internal                         |
| Discharge Connection Quantity:            |
| 1   |
| Discharge Connection Type:                |
| Threaded internal                         |
| Cooling Medium:                           |
| Air                                       |
| Specific Gas For Which Designed:          |
| Air                                       |
| Pumping Element Type:                     |
| Interlocking split vanes and rotor type   |
| Operating Speed At Rated Capacity In Rpm: |
| 2250.0                                    |
| Air Displacement Rate:                    |
| 30.0 cubic feet per minute in free air    |
| System Design:                            |
| Noncorrosive                              |
| Special Features:                         |
| Reversible rotation                       |
| Fsc Application Data:                     |
| Vacuum system, aircraft                   |
| Shelf Life:                               |
| N/a                                       |
| Unit Of Measure:                          |
|   |
| Demilitarization:                         |
| No  |
| Fiig:                                     |
| A06700                                    |
