Brake Horsepower Required:

0.333

Stage Quantity:

2

Intake Connection Quantity:

1

Discharge Connection Quantity:

1

Furnished Items:

Electric power cable and inlet filter and quantity sight gage

Overall Length:

15.500 inches

Overall Height:

9.750 inches

Overall Width:

5.625 inches

Current Type:

Ac

Cooling Medium:

Oil

Pump Quantity:

1

Pump Body Material:

Aluminum alloy

Pumping Element Type:

Sliding vane

Vapor Condensation Preventative Device:

Gas ballast valving

Air Displacement Rate:

4.0 cubic feet per minute in free air

Minimum Operating Temp:

32.0 degrees fahrenheit

System Design:

Noncorrosive

Prime Mover Type:

Electric motor

Current Rating In Amps:

2.2

Features Provided:

Lockout for checking refrigerant leaks

Voltage In Volts:

115.0

Phase:

Single

Special Features:

Offset rotary vane design

Frequency In Hertz:

60.0

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A06700
