Rotary Vacuum Pump Unit - Page 1 of 2

View Online at https://aerobasegroup.com/nsn/4310-01-364-3370 **Brake Horsepower Required:** 0.333 **Stage Quantity: Intake Connection Quantity: Discharge Connection Quantity: Furnished Items:** Electric power cable and inlet filter and quantity sight gage **Overall Length:** 15.500 inches **Overall Height:** 9.750 inches **Overall Width:** 5.625 inches **Current Type:** Ac **Cooling Medium:** Oil **Pump Quantity:** 1 **Pump Body Material:** Aluminum alloy **Pumping Element Type:** Sliding vane **Vapor Condensation Preventative Device:** Gas ballast valving Air Displacement Rate: 4.0 cubic feet per minute in free air **Minimum Operating Temp:** 32.0 degrees fahrenheit System Design: Noncorrosive **Prime Mover Type:** Electric motor **Current Rating In Amps:** 2.2 **Features Provided:** Lockout for checking refrigerant leaks

Voltage In Volts:

115.0

Rotary Vacuum Pump Unit - Page 2 of 2

Phase:
Single
Special Features:
Offset rotary vane design
Frequency In Hertz:
60.0
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No

Fiig: A06700
