Special Features:

Positioner, air cylinder for electric drive chiller, serial number 352-4033; application: clockwise flow control indicating type, three gauge monitor input signal and relay output to the top and underside of actuator piston, positioner base cover and beam aluminum die casting, input signal range 3-15, 6-30 psig, supply pressure 150 psig., 50 psig, static air consumption 20 scfh with 100 psig supply pressure, bellows pressure rating standard 50 psig, optional 90 psig, operating temperature 30 to 175 degree f

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
