Overall Diameter:

3.292 inches

End Application:

Weapons system jg, seawolf class ssn; chilled water system cord

Product Name:

Plate is a component of a flanged c-o-r-d, cascade orificial resistive device

Special Features:

Plate has eleven 0.438" diameter through holes with eight holes 45deg apart on a 2.38" diameter circle with top and bottom holes on the vertical center line and three holes on a 1.25" diameter circle with one hole 53deg above horizontal center line on the left side of the vertical center line, the second hole 37deg above horizontal center line and the third hole 7deg to the left of the vertical center line and below the horizontal center line; a through center hole 0.377" diameter with the top side of center hole flat 0.128" above horizontal center line

Material:

Nickel alloy

General Description:

Plate is 0.125" thick; material per mil-c-15726 aly c71500

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
