Piston Ring - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/4310-01-422-1974

Cross Sectional Shape:
Plain rectangular, two piece, straight face
Ring Style:
Concentric
Radial Wall Thickness:
0.1870 inches
Overall Width:
0.0600 inches
Standard Bore Diameter:
2.000 inches
Joint Style:
Step joint
End Application:
Aircraft, airlifter c-17a
Charles Factures
Special Features:
Expander ring free length, 4.594in.; width 0.093in.
•
Expander ring free length, 4.594in.; width 0.093in.
Expander ring free length, 4.594in.; width 0.093in. Material:
Expander ring free length, 4.594in.; width 0.093in. Material: Stainless steel expander
Expander ring free length, 4.594in.; width 0.093in. Material: Stainless steel expander Material Specification:
Expander ring free length, 4.594in.; width 0.093in. Material: Stainless steel expander Material Specification: Turcon 1 mfr ref single material response
Expander ring free length, 4.594in.; width 0.093in. Material: Stainless steel expander Material Specification: Turcon 1 mfr ref single material response Shelf Life:
Expander ring free length, 4.594in.; width 0.093in. Material: Stainless steel expander Material Specification: Turcon 1 mfr ref single material response Shelf Life: N/a
Expander ring free length, 4.594in.; width 0.093in. Material: Stainless steel expander Material Specification: Turcon 1 mfr ref single material response Shelf Life: N/a
Expander ring free length, 4.594in.; width 0.093in. Material: Stainless steel expander Material Specification: Turcon 1 mfr ref single material response Shelf Life: N/a Unit Of Measure:
Expander ring free length, 4.594in.; width 0.093in. Material: Stainless steel expander Material Specification: Turcon 1 mfr ref single material response Shelf Life: N/a Unit Of Measure: Demilitarization:
Expander ring free length, 4.594in.; width 0.093in. Material: Stainless steel expander Material Specification: Turcon 1 mfr ref single material response Shelf Life: N/a Unit Of Measure: Demilitarization: No
