Chamfer Angle In Deg:

5.0

Chamfer Length:

Between 1.230 inches and 1.250 inches

End Application:

Actuator, hydraulic for seawolf class

Top Inside Chamfer:

Included

Special Features:

Smaterial is steel, astm a519, grade 1018/1026 cds mechanical steel tubing, recommended purchase size of 1 3/8 inch od x 7/8 inch id; bore to 0.926 - 0.925 inches before honing and plating; hone and hard chrome plate inside diameter only as required to provide finished size of 0.9270 - 0.9265 inch per qq-c-320, class 2, thickness to be .0010/.0015 chrome per side; inside diameter may increase, up to maximum of .001 due to stress relieving from final machining of the outside diameter

Material:

Steel

Material:

Steel

Style Designator:

Dry, flanged, relieved

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T267-b
