Overall Height:

8.880 inches

Overall Width:

12.300 inches

Current Type:

Ac

Specific Gas For Which Designed:

Air

Pumping Element Type:

Piston

Operating Speed At Rated Capacity In Rpm:

1725.0

Minimum Operating Temp:

32.0 degrees fahrenheit

System Design:

Corrosive

End Application:

Oxygen concentration system

Prime Mover Type:

Electric motor

Voltage In Volts:

115.0 and 230.0

Phase:

Single

Special Features:

Oilless piston motor mounted vacuum pump; rugged construction; pumps only clean, dry air; operating temperature 32/104 degrees f; requires no lubrication; polytetrafluoroethylene-filled rings are self-lubricating; motor bearings are grease-packed for lifetime of bearings

Frequency In Hertz:

60.0

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A06700
