End Application:

Amphibious transport dock lpd17

Product Name:

Combustion air-intake filter

Special Features:

Material type 316l sst; end connection 38in., flanged; fluid air; temperature 100.4 degrees f; pressure 2 psig; single stage and in clean condition, provide 99% retention for dirt particles 10 microns; filter elements shall be interchangeable between main propulsion and ship service generator diesel engine; filter element shall consist of filter media pads enclosed in galvanized steel frames ly sized 600mm x 600mm x 50mm

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A24000
