End Application:

F16 c&d

Special Features:

Internal spline data; fillet root side fit; c/o sixteen teeth; spline pitch 32/64; pressure angle 30 deg; base diameter 0.433 ref; pitch diameter (0.500); circular space width, min eff 0.551, maximum eff (0.056) ref, min actual (0.564) ref, maximum actual 0.576; fillet radius min 0.007; form diameter 0.535; major or outside diameter 0.567 in. Min od; 0.575 in maximum od; minor or inside diameter 0.479 in. Min id, 0.482 in. Maximum id; material nitalloy n per ams 6475

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
