| Mounting Type:                      |
|-------------------------------------|
| Flange                              |
| Media For Which Designed:           |
| Hydrocarbon fuels and oils          |
| Maximum Discharge Flow Rate:        |
| 38.0 gallons per minute             |
| Discharge Pressure:                 |
| 2000.0 pounds per square inch gage  |
| Operating Speed At Rated Capacity:  |
| 2400.0 revolutions per minute       |
| Pumping Element Operating Position: |
| Horizontal                          |
| Pump Rotation Direction:            |
| Clockwise                           |
| Rotary Pump Design:                 |
| Gear                                |
| Operation Method:                   |
| Powered                             |
| Drive Shaft Type:                   |
| Splined, involute external          |
| Drive Shaft Length:                 |
| 1.310 inches                        |
| Special Features:                   |
| Flange sae a 2-bolt                 |
| Shelf Life:                         |
| N/a                                 |
| Unit Of Measure:                    |
| -                                   |
| Demilitarization:                   |
| No                                  |
| Fiig:                               |
| A19400                              |
|                                     |
|                                     |
