Cylinder Quantity:

1

Intake Connection Quantity:

1

Discharge Connection Quantity:

1

Media For Which Designed:

Oil

Pumping Element Type:

Piston

End Application:

Oil sump pump

Pumping Element Operating Position:

Vertical

Pump Reciprocating Design:

Single acting

Reciprocating Stroke Type:

Variable

Operation Method:

Manual

Special Features:

Pump mounted on port side of flywheel housing with a bracket

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A19400
