End Application:

Pump, centrifugal p/n 2 1-2I used onboard 400 ft wagb coast guard vessels

General Description:

Static o-ring on the shaft, guaranteed non-fretting. Seal ring support shoulder, machined square within 0.001 inch tolerance. Compound integral drive pads. Stress relieved faces are hydraulically balanced and mate over a narrow cross-section for low frictional heat. Flush port can be rotated to a convenient location for ease of piping. Stationary springs, isolated for fluid to prevent clogging. Adjustable gland fits virtually any bolt circle. Patent pending. Semi-finished gland can be used with the standard components to meet ap1610 in a cost-effective manner. Centering strap one-step installation device. Patent no. 4, 989, 882. Self-centering lock ring achieves superior concentricity. Patent no. 4, 639, 000.
