Operating Speed At Rated Capacity In Rpm:

2100.0

End Application:

Onboard 420 ft wagg coast guard vessels

Shaft Rotation Direction:

Clockwise and counterclockwise

Displacement Type:

Variable

Constant Displacement Per Revolution:

24.600 cubic inches

Special Features:

Vfluid class compatible w/buna n; primary controls - cylinder w/adjustable and stops; primary control options - adjustable volume stops; control location - command on port a side; shuttle - without orifices

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T103-f
