Cylinder Quantity:

1

Intake Connection Quantity:

1

Discharge Connection Quantity:

1

Media For Which Designed:

Oil and water, fresh

Pumping Element Type:

Piston

End Application:

Advanced seal delivery system facility

Pump Reciprocating Design:

Single acting

Reciprocating Stroke Type:

Variable

Operation Method:

Manual

Product Name:

Hydrostatic test pump

Special Features:

Zall wet parts are bronze, brass or stainless steel; body and fittings are machined bronze, brass; piston is stainless steel, dia. 0.75, packing is buna n o-ring with backup; spring loaded check valves; intake (suction) connection, female hose swivel with screened coupling washer for attachment; output (pressure) connection is 1/4 in. Npt female pipe at end of gauge block; flexible hose, 4 ft. 1/4 in. Npt m ends is included; working pressure: 6000 psi; 28,000 psi burst pressure

Type/model Designation:

7j-55.1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A19400
