End Application:

Transmitter unit - rudder angle 144409

Product Name:

Pump shaft seal, style 2

Special Features:

Shaft size: 1.25in.; seal (od): 1.734in.; working length: 1.062in.; seat bore: 1.875in.; seat thickness: 0.437in.; material: diaphragm - buna, washer - carbon, seat - ceramic; max. Pressure: 250 psi unbalanced, 650 psi balanced; speed: 5000 ft/min.; temperature range for buna-n: -40 degrees f to 190 degrees f; durometer: shore a, 65

Material:

Stainless steel

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900
