Cylinder Quantity:

1

Media For Which Designed:

Fuel or sewage or oil

Pumping Element Type:

Piston

End Application:

Advanced seal delivery system (asds)

Reciprocating Stroke Type:

Variable

Operation Method:

Manual

Pump Basic Material:

Brass

Product Name:

Pump, hand, reciprocating

Special Features:

Bilge pump: 1/2, 1/4 inch. Hose diameter: 1/2, 1/4 inch. 1 gallon per 40 stroke. Hose: discharge/suction. Length: 2 feet 40 inches. Multi-purpose brass construction. Can be used in any position. Pump has neoprene suction and discharge ports, seamless 1 1/4 inch diameter brass cylinder with brass plunger and snap-action self-seating neoprene disc valve. Oil rating should not exceed 140 degrees fahrenheit. Can be used for bilge pumping, oil draining, or diesel fuel transfer.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
