Mounting Type:

Base

Cylinder Quantity:

1

Intake Connection Quantity:

1

Discharge Connection Quantity:

1

Media For Which Designed:

Water, fresh or oil

Pumping Element Type:

Piston

End Application:

Abtts water/fuel transfer system w/iso

Pump Reciprocating Design:

Single acting

Control Location:

Center

Operation Method:

Manual

Criticality Code Justification:

Feat

Product Name:

Hydrostatic test pump/model4a

Special Features:

Weapons system essential. Pressure: maximum psi is 1000. Piston: 5/8 inch diameter. Stroke: 1 1/4 inch. Displacement: 0.38 cubic inches. All wet parts are bronze, brass or stainless steel. Body and fittings: machined brass or bronze. Piston: stainless steel. Spring loaded conical poppet valves action. Positive seal attained through replaceable buna n seals in poppet. Piston packing is buna n o-ring with backup. Weight: 7 lbs. Aluminum channel base. 20.0 inches long x 3 inches wide x 4 1/2 inches high. The base is removable for fixed mounting. The manual load is 60 lbs. Intake connection is female hose swivel with screened coupling washer for attachment of standard garden hose. Output pressure connection is 1/4 inch npt female pipe at the end of the gauge block. Pressure gauge included.
