**Media For Which Designed:**

Hydrocarbon fuels and oils and liquid

**Maximum Discharge Flow Rate:**

10.0 gallons per minute

**Operating Speed At Rated Capacity:**

100.0 revolutions per minute

**Operation Method:**

Manual

**Product Name:**

Drum pump

**Special Features:**

Rotary hand pump with counter; telescoping suction pipe, 22in.-40in.; base: 2in. Npt; 8ft. Output hose; discharge hose has anti-static wire in hose; aluminum die cast body; vacuum breaker prevents siphoning when nozzle is below level; durable carbon composition, spring loaded vanes; built-in stainless steel strainer

**Type/model Designation:**

Drm597

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A19400
