Media For Which Designed:

Hydrocarbon fuels and oils and liquid

Maximum Discharge Flow Rate:

10.0 gallons per minute

Operating Speed At Rated Capacity:

100.0 revolutions per minute

Operation Method:

Manual

Product Name:

Drum pump

Special Features:

Rotary hand pump with counter; telescoping suction pipe, 22in.-40in.; base: 2in. Npt; 8ft. Output hose; discharge hose has anti-static wire in hose; aluminum die cast body; vacuum breaker prevents siphoning when nozzle is below level; durable carbon composition, spring loaded vanes; built-in stainless steel strainer

Type/model Designation:

Drm597

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A19400
