End Application:

Pump, centrifugal (p/n n-99-6301-b-007)

Product Name:

Impeller

Special Features:

Material spec: astm b 367, grade c-5. P/n 002-6301-c01-317. Radial clearances between impeller and casing wear ring are .010 min and .014 maximum (factory dimensions). Recommended wear limits are .020 to .026 radial.

Material:

Titanium

Material:

Titanium

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T114-c
