Maximum Operating Pressure:

3200.0 pounds per square inch

End Application:

Eurocopter dauphin as365n; hh65a; ec155

Portability:

Portable

Operation Method:

Power

Hydraulic Fluid Reservoir:

Not included

Rolling Element Type And Quantity:

4 caster

Product Name:

Hydraulic power unit

Special Features:

Functions as alternative power source to adjust settings during periodical controls, such as checking retractable landing gears, adjusting automatic pilot, etc; 110/220 volts; single phase; equipped with suction hose for connecting to helicopter tank and an exhaust hose for connecting to the hydraulic system of the aircraft

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T103-n
