Power Driven Hydraulic Pumping Unit - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/4320-01-528-1218

Maximum Operating Pressure:
3200.0 pounds per square inch
End Application:
Eurocopter dauphin as365n; hh65a; ec155
Portability:
Portable
Operation Method:
Power
Hydraulic Fluid Reservoir:
Not included
Rolling Element Type And Quantity:
4 caster
Product Name:
Hydraulic power unit
Special Features:
Functions as alternative power source to adjust settings during periodical controls, such as checking retractable landing gears, adjusting
automatic pilot, etc; 110/220 volts; single phase; equipped with suction hose for connecting to helicopter tank and an exhaust hose for
connecting to the hydraulic system of the aircraft
Shelf Life:
N/a
Unit Of Measure:
-
Demilitarization:
No
Filg:
Г103-n
