End Application:

Ramp assembly, bow for inls craft

Voltage In Volts And Current Type:

460.0 ac

Product Name:

Bow ramp hydraulic power unit

Special Features:

Description: relief valve pressure setting equals 3200 psi max. The flow rate is 10 gpm. The hpu motor specs are: 20 hp, nema b 256tc frame, 1.15 sf, 460 vac 3-phase, 60 hz (supplied by ols). The reservoir size is 20 gallons (stainless steel construction). Fluid temperature: -20 degrees fahrenheit to +170 degrees fahrenheit (not to exceed 170 degrees fahrenheit).

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900
