Product Name:

Waterjet

Special Features:

Single stage - axial flow pump; impeller diameter 14 in.; rotation anti-clockwise; nozzle diameter range 178mm-198mm; impeller material stainless steel; casting material aluminum alloy; rear bearing water lubricated cutlass rubber; thrust bearing grease lubricated; shaft stainless steel; coupling flange spicer 1600 series; corrosion protection cathodic with anodes; seal face type mechanical seal; steering type polytetrafluoroethylene sealed nozzle; steering system hydraulic actuation; reverse system hydraulically actuated high thrust

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T103-k
