Mounting Type:

Base

Media For Which Designed:

Water, fresh and water, salt and water, waste

End Application:

Light amphibious resupply craft (larc v) slep

Pumping Element Operating Position:

Horizontal

Product Name:

S hydraulic drive pump

Special Features:

S pumps are lightweight and chemically resistant for general service on water, salt water, waste water, mild acids and bases. Description: self-priming centrifugal, glass reinforced polyester construction, stainless steel internal and external fasteners, epdm o-rings and check valve, 316 stainless steel shaft adapter, and pressure gauge for adjusting rpm. Port size: 1 1/2 inch. Req'd hp: 1.7. Ship weight: 16 lbs.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
