End Application:

Plasma thawing system

Voltage In Volts And Current Type:

110.0 ac

Product Name:

(inavy) 110v pump

Special Features:

Used to create kneading effect on frozen pockets of plasma, by circulating 30 degree celsius temperature water around pockets (bags) in order to thaw glycerized red blood cells (plasma).

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
