**Mounting Type:**

Base

**Environmental Protection:**

Watertight

**Pump Quantity:**

1

**Pumping Element Operating Position:**

Horizontal

**Pump Basic Material:**

Steel

**Prime Mover Type:**

Electric motor

**Inclosure Type:**

Fully enclosed

**Special Features:**

Low pressure pump. All liquid exposed parts are made of 316 stainless steel. Handles corrosive liquids up to 230 degrees f and develops up to 115 psi (275 feet of head). Connections are standard npt. Equipted with bellows-type shaft seals, sic/sic, carbon/tc, tc/tc, epdm and fpm options. Applications: di water, hot and cold liquids, oils, mild acids, aromatic hydrocarbons, portable water, alkalis.

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No
