Intake Connection Quantity:

1

Discharge Connection Quantity:

1

Media For Which Designed:

Ethylene glycol and oil

End Application:

Auxiliary system, general

Maximum Discharge Flow Rate:

10.0 gallons per minute

Operating Speed At Rated Capacity:

135.0 revolutions per minute

Rotary Pump Design:

Sliding vane

Operation Method:

Manual

Pump Basic Material:

Iron, cast

Features Provided:

Self-priming

Special Features:

Curved discharge spout; buna n seals; max. Temp. 140 deg. F; length 11 inches; inlet size: 1 in fnpt; outlet size: 1 in outside dia; adapter type: 2 in npt bung; for use on 15, 30, 55 gal drums

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A19400
