End Application:

Bare base water system

Component Document Origin:

Government

Document Identification:

437a-75-0005

Functional Description:

Main potable water booster pump units used to pressurize water distribution loops. Raw water units used to supply water to wash rack assemblies

Reference Data And Literature:

Wright-patterson asd specification 437a-75-0005

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A23800
