**Mounting Type:**

Frame

**Cylinder Quantity:**

9

**Pumping Element Type:**

Piston

**Discharge Pressure:**

3770.0 pounds per square inch gage

**Pump Rotation Direction:**

Clockwise

**Reciprocating Stroke Type:**

Variable

**Volume Control Type:**

Pressure compensation

**Drive Shaft Type:**

Splined, straight external

**Product Name:**

Axial piston open circuit pump, load sensing, pressure compensated

**Special Features:**

Pressure compensation setting 260 bar; load sensing setting 20 bar

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A19400
