Mounting Type:

Frame

Cylinder Quantity:

9

Pumping Element Type:

Piston

Discharge Pressure:

3770.0 pounds per square inch gage

Pump Rotation Direction:

Clockwise

Reciprocating Stroke Type:

Variable

Volume Control Type:

Pressure compensation

Drive Shaft Type:

Splined, straight external

Product Name:

Axial piston open circuit pump, load sensing, pressure compensated

Special Features:

Pressure compensation setting 260 bar; load sensing setting 20 bar

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A19400
