#### **Pump Rotation Direction:**

Clockwise

### **Product Name:**

Self priming centrifugal pump model 04e1-ghh

## **Special Features:**

Size: 4 inches by 4 inches victaulic; casing: aluminum 356-t6 operating pressure 325 psi; enclosed type, six van impeller: aluminum 356-t6 handles 0, 687 inches diameter spherical solids; impeller shaft: alloy steel 8620; two replaceable wear rings: gray iron 30; suction head: aluminum 356-t6; gearbox housing: gray iron 30; gearbox lubrication: sae 90 gear oil; gears: alloy steel 8620 and carbon steel 12114; rear ratio: 2.56: 1 increase; bearings: open single row ball, roller and tapered roller; gaskets: buna-n, resistant syntheic rubber and cork; hardware: standard plated steel; standard equipment: mounting cross member and trunnion assembly, air shift. 1800 series dana flanges; optional equipement: auxiliary pto shaft. Speedometer adapter; length 23.02 inches; width 22.57 inches

### Shelf Life:

N/a

#### Unit Of Measure:

---

# Demilitarization:

No Fiig:

A19400
