Product Name:

Pump, hyd, closed loop; piston variable pump

Special Features:

Var. Swashplate design; nom. Pressure: 5800 psi (400 bar), peak: 6500 psi (450 bar); closed circuit; electric control w/supply filtration - 24 vdc; w/std pressure cut-off, w/o da control valve; rotation: ccw; splined shaft for single pump; mounting flange: sae j744 - 2+4 bolt; sae flange ports, suction port s bottom; w/integrated boost pump, w/o through drive; w/high-pressure relief valve, pilot operated - 1450 - 6100 psi w/bypass; filtration in suction line of boost pump, ports for ext. Boost circuit filtration; filter mounted w/cold start valve and contamination indicator through window

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900
