Filtering Material:

Copper nickel alloy

Filtering Material Design:

Multiple stacked disks

Filtration Rating In Microns:

64.0

Drain Plug:

Not included

Installation Design:

Fixed

Bypass Valve Operation Method:

Automatic

Unit Type:

Single

Maximum Operating Pressure:

300.0 pounds per square inch

Magnet:

Not included

Drain Cock:

Not included

Filtering Element Quantity:

1

Element Reusability Feature:

Reusable

Cleaning Blade:

Not included

Flow Type:

Bypass

Bypass Valve:

Included

Air-bleed Valve:

Not included

Special Features:

Suitable for use w/mil-I-7808 at minus 65 to 250.0 degrees f at 12.0 gal per minute

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T384-a
