Current Type:

Ac

Filtering Material:

Cellulose

Filtering Material Design:

Molded

Filtration Rating In Microns:

1.0

Frequency In Hertz:

60.0

Drain Plug:

Not included

Installation Design:

Mobile

Voltage Rating:

Between 220.0 volts and 440.0 volts

Horsepower Rating:

2.000

Unit Type:

Single

Power Source:

Electric motor

Maximum Operating Pressure:

75.0 pounds per square inch

Magnet:

Not included

Drain Cock:

Included

Mobility Support Type:

Dolly truck

Filtering Element Quantity:

7

Element Reusability Feature:

Nonreusable

Cleaning Blade:

Not included

Flow Type:

Full

Air-bleed Valve:

Included

Sediment Bowl Material:

Steel

Storage Facility Capacity:

120.0 gallons

Circulating Pump Manufacturer Name:

Industrial filter and pump mfg co

Circulating Pump Manufacturer Identifying Name:

Centrifugal pump

Circulating Pump Manufacturer Identifying Number:

Model a2-60

Product Name:

Clarifier, oil

Phase:

Three

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T384-a
