Body Diameter:

6.000 inches

Body Inside Diameter:

1.250 inches

Flow Direction:

Parallel

Design Type:

Limited

Bodylength:

21.000 inches

Filtering Media Design:

Multiple stacked disks single filtering media response

Special Features:

Steel perforated disks separate each wool disk, 1.750 in. Diameter tube through center of element, 28.000 in. Tube lg, furnished w/2 gaskets

Material:

Wool filtering medium

Media For Which Designed:

Any acceptable

Style Designator:

Multiple stacked disks, w/out cleaning blades

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A24000
