**Body Diameter:**

0.734 inches

**Body Thickness:**

Between 0.182 inches and 0.187 inches

**Design Type:**

Reusable

**Filtering Media Design:**

Sintered single filtering media response

**Special Features:**

2 holes, 180.0 degrees apart, 0.187 in. From center, 0.062 in. Diameter drilled at 30.0 degrees angle towards center

**Material:**

Copper alloy filtering medium

**Media For Which Designed:**

Fuel/oil, hydrocarbon

**Style Designator:**

Round (basically flat)

**Fsc Application Data:**

Power drive, guided missile launching system

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A24000
