Body Diameter:

0.734 inches

Body Thickness:

Between 0.182 inches and 0.187 inches

Design Type:

Reusable

Filtering Media Design:

Sintered single filtering media response

Special Features:

2 holes, 180.0 degrees apart, 0.187 in. From center, 0.062 in. Diameter drilled at 30.0 degrees angle towards center

Material:

Copper alloy filtering medium

Media For Which Designed:

Fuel/oil, hydrocarbon

Style Designator:

Round (basically flat)

Fsc Application Data:

Power drive, guided missile launching system

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A24000
