NSN 4330-01-290-4490

Fluid Filter - Page 1 of 2

view Online at https://aerobasegroup.com/nsn/4330-01-290-4490
Mounting Type:
Inlet connection line and outlet connection line
Body Outside Diameter:
3.750 inches
Body Height:
7.140 inches
Filtration Rating In Microns:
5.0
Drop Pressure:
Not rated
Differential Pressure:
Not rated
Design Type:
Reusable
Tempurature Rating:
Between -40.0 degrees fahrenheit and 225.0 degrees fahrenheit
Features Provided:
By-pass valve
Filtering Element Quantity:
1
Maximum Operating Pressure:
maximum operating recours.
Not rated
Not rated
Not rated Filtering Media Design:
Not rated Filtering Media Design: Any acceptable single filtering media response
Not rated Filtering Media Design: Any acceptable single filtering media response First Intake Connection Type:
Not rated Filtering Media Design: Any acceptable single filtering media response First Intake Connection Type: Threaded internal pipe head
Not rated Filtering Media Design: Any acceptable single filtering media response First Intake Connection Type: Threaded internal pipe head First Discharge Connection Relationship To Intake Connection:
Not rated Filtering Media Design: Any acceptable single filtering media response First Intake Connection Type: Threaded internal pipe head First Discharge Connection Relationship To Intake Connection: Identical to first intake connection
Not rated Filtering Media Design: Any acceptable single filtering media response First Intake Connection Type: Threaded internal pipe head First Discharge Connection Relationship To Intake Connection: Identical to first intake connection First Intake Thread Series Designator:
Filtering Media Design: Any acceptable single filtering media response First Intake Connection Type: Threaded internal pipe head First Discharge Connection Relationship To Intake Connection: Identical to first intake connection First Intake Thread Series Designator: Nptf
Not rated Filtering Media Design: Any acceptable single filtering media response First Intake Connection Type: Threaded internal pipe head First Discharge Connection Relationship To Intake Connection: Identical to first intake connection First Intake Thread Series Designator: Nptf First Intake Thread Size:
Not rated Filtering Media Design: Any acceptable single filtering media response First Intake Connection Type: Threaded internal pipe head First Discharge Connection Relationship To Intake Connection: Identical to first intake connection First Intake Thread Series Designator: Nptf First Intake Thread Size: 0.750 inches
Filtering Media Design: Any acceptable single filtering media response First Intake Connection Type: Threaded internal pipe head First Discharge Connection Relationship To Intake Connection: Identical to first intake connection First Intake Thread Series Designator: Nptf First Intake Thread Size: 0.750 inches First Intake Thread Direction:
Not rated Filtering Media Design: Any acceptable single filtering media response First Intake Connection Type: Threaded internal pipe head First Discharge Connection Relationship To Intake Connection: Identical to first intake connection First Intake Thread Series Designator: Nptf First Intake Thread Size: 0.750 inches First Intake Thread Direction: Right-hand
Filtering Media Design: Any acceptable single filtering media response First Intake Connection Type: Threaded internal pipe head First Discharge Connection Relationship To Intake Connection: Identical to first intake connection First Intake Thread Series Designator: Nptf First Intake Thread Size: 0.750 inches First Intake Thread Direction: Right-hand Filtering System For Which Designed:
Filtering Media Design: Any acceptable single filtering media response First Intake Connection Type: Threaded internal pipe head First Discharge Connection Relationship To Intake Connection: Identical to first intake connection First Intake Thread Series Designator: Nptf First Intake Thread Size: 0.750 inches First Intake Thread Direction: Right-hand Filtering System For Which Designed: By-pass flow
Filtering Media Design: Any acceptable single filtering media response First Intake Connection Type: Threaded internal pipe head First Discharge Connection Relationship To Intake Connection: Identical to first intake connection First Intake Thread Series Designator: Nptf First Intake Thread Size: 0.750 inches First Intake Thread Direction: Right-hand Filtering System For Which Designed: By-pass flow Material:
Filtering Media Design: Any acceptable single filtering media response First Intake Connection Type: Threaded internal pipe head First Discharge Connection Relationship To Intake Connection: Identical to first intake connection First Intake Thread Series Designator: Nptf First Intake Thread Size: 0.750 inches First Intake Thread Direction: Right-hand Filtering System For Which Designed: By-pass flow Material: Rubber buna n seal

Threaded shell (mason jar)
