Body Diameter:

0.710 inches

Body Thickness:

Between 0.007 inches and 0.009 inches

Wire Diameter:

0.0045 inches

Mesh Size:

100.0

Design Type:

Reusable

Filtering Media Design:

Mesh single filtering media response

Material:

Copper alloy filtering medium

Media For Which Designed:

Fuel/oil, hydrocarbon

Style Designator:

Round (basically flat)

Specification Data:

81348-ww-r-360 government specification

Specification Or Standard:

Vi type and 1 class

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A24000
