Fluid Filter Assembly - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/4330-01-358-4211

Supplementary Features:

Multiple stacked disks, without ccleaning blades; cylindrical opening m1000: flowrate: 1000gph; particle retention: down to 10u without precoat downto 1u with precoat; weight: 35 lbs; materials of construction: wet end - cpvc w/pp discs, pump head - cpvc w/ open impeller, mount - stainless steel; motor 110 volt, 1 phase, 1/4 hp, tefc with switch

Fsc Application Data:

Portable in tank filter with a washable reuseable media disk type filtration system;	use to filter various acid chemical tanks in plating facility
Shalf Life:	

N/a

Unit Of Measure:

Demilitarization:

No

Fiig:

A24000
