Supplementary Features:

Material: 300-series cres. Resistance weld. Sintered wire mesh element; effective filter area: .93 sq in; filtration screen: 20 x 20 x .014 dia; length: 1.25 min to 1.35 max; flange thickness: 010; outside diameter: .46; bottom tip of element: pinched and resistance weld

Fsc Application Data:

Filter element, fluid

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:
