**Supplementary Features:**

Material: 300-series cres. Resistance weld. Sintered wire mesh element; effective filter area: .93 sq in; filtration screen: 20 x 20 x .014 dia; length: 1.25 min to 1.35 max; flange thickness: .010; outside diameter: .46; bottom tip of element: pinched and resistance weld

**Fsc Application Data:**

Filter element, fluid

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A24000
