Body Diameter:

47.0 millimeters

Filtration Rating In Microns:

10.0

Flow Direction:

Outside in

Tempurature Rating:

260.0 degrees celsius

Filtering Media Design:

Porous single filtering media response

Special Features:

Hydrophobic membrane element; biologically and chemically inert; used for clarification of acids/bases rna isolation, cryogenics and hydraulic fluid analysis; aromatic hydrocarbons to 80deg c

Material:

Plastic polytetrafluoroethylene filtering medium

Style Designator:

Round (basically flat)

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A24000
