End Application:

Filter

Tempurature Rating:

225.0 degrees fahrenheit

Filtering Element Quantity:

01

Maximum Operating Pressure:

3000.0 pounds per square inch

Special Features:

Flow rating: up to 20 gpm; min. Yield pressure 10, 000 psi; rated fatigue pressure: 2400 psi; bypass setting: cracking: 40 psi, full flow: 85

Material:

Aluminum body

Media For Which Designed:

Fuel/oil, hydrocarbon

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A24000
