Tempurature Rating:

225.0 degrees fahrenheit

Filtering Element Quantity:

1

Maximum Operating Pressure:

100.0 pounds per square inch

Special Features:

Dual inlet ports; check valve prevents reservoir siphoning; heavy duty flange for reservoir sealing dirt alarm located on top or side of filter; specifications; pressure rating, 100 psi max.; operating, 400 psi min. Yield; max. Operating temperature 225 degrees f; bypass valve setting, cracking 25 psi, fullflow 39 psi; material; porting head & cap; die cast aluminum; element case: steel; compatibility; all petroleum based hydraulic fluid; weight, 4 lbs.; element model number; 8z3, series e media

Material:

Aluminum body and steel body

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A24000
