Body Diameter:

2.500 inches

End Application:

Filter elements

Design Type:

Nonreusable

Filtering Media Design:

Molded single filtering media response or spun single filtering media response

Special Features:

Requires no separate central core; contain no wetting agents, solvents, anti-static agents, binders or additives of any kind

Material:

Plastic polypropylene body

Style Designator:

Round (basically flat)

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A24000
